# Milestone #2 (Project step)

1. **GRAPHICAL USER INTERFACE DESIGN**
   *This section describes the user interfaces involved in this application and XML language is used for designing user interface in android application. XML files that represent all the
   user interfaces are located inside layout directory of the application package.

2. **IMPLEMENTATION**
   This section describes the implementation of all the graphical user interfaces involved in this application. Implementation is the realization of application specification, idea and design. It involves programming codes written in order to achieve ideas and requirements of each user interface of the application.
